NAVIGATING NOISE.

RADICAL UNIVERSALISM

Radical universalism is the end of the epidemic particularism, which has paralyzed left and progressive forces throughout the western societies in the last 40 years. Radical feminists such as Andrea Dworkin and Valerie Solanas exemplify how identity politics as a successful force from '68

until the late 80s and even whilst in terms of literature bordered the absurd. How a radical claim, and be it in satire, can change the world.

The following wave of gender, racist and anti-discrimination discourses of the present are useful for the vast majority. But there is a small but particularly destructive form of particularization which I call toxic wokeness. It produces the evils it tries to eradicate: gender separation, racism, taboos. It's biggest blind spot is the capitalization of the social sphere.

The resulting split of society is based on a neoliberal logic, which terms the individual cause and solution of societal problems. This logic is based on a vulgar-derridian postmodernism, in which the objective world is at best a play of signs. Feeling is the only solipsistic perspective having power of proof. This leads to a cynical particularism, which is eroding left and progressive forces. The most prominent example is: the fight against the climate catastrophe.

I am clearly distancing myself from simplistic philosophies from the right, who are misusing „wokeness“ as a dog whistle for their agenda. This being Jordan Peterson, or, in Germany Omri Böhm with his new book „Radical Universalim“. I am also distancing myself from the tendency of particularists of labeling everybody not agreeing with their standpoint as racist, sexist or similar.

As a solution I present my research with the climate movement „Letzte Generation“. These radical environmentalism block highways, toss potato soup at famous painings and use civil disobedience in general. Contrary to older protest forms they are radically transparent and are intent on confronting justice in the legal process. They draw on movements like the Freedom Riders or Matrin Luther King. The particularist discourses of gender, ethnicity, even capitalism are only marginally relevant for them. They deal with an objective enough reality and post simple yes/no questions, which can be answered clearly. The closest thing to radical universalism of our time.

I do not exist. I am a psydonym, Kristjan Knall. My books are unapologetically revolutionary, pseudo-scientific in the worst possible sense and should be burnt entirely. Though not a man of royalty, I am

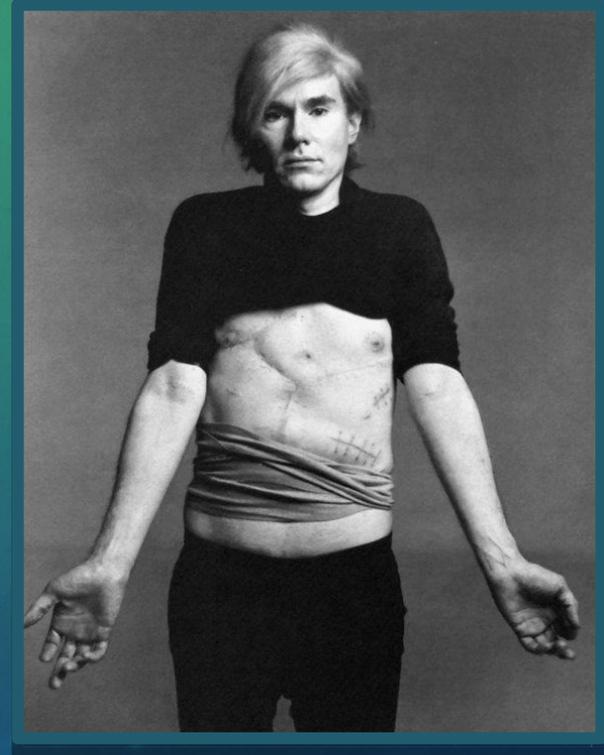

available for an epee duel at dawn.

VALERIE SOLANAS

INTRODUCTION BY AVITAL RONELL

"Articulate, angry and funny." *Guardian*

Money Quotes:

Valerie Solanas:

Give me fifteen cents, and I'll give you a dirty word.

Maurice Girodias:

What's the word?

Valerie Solanas:

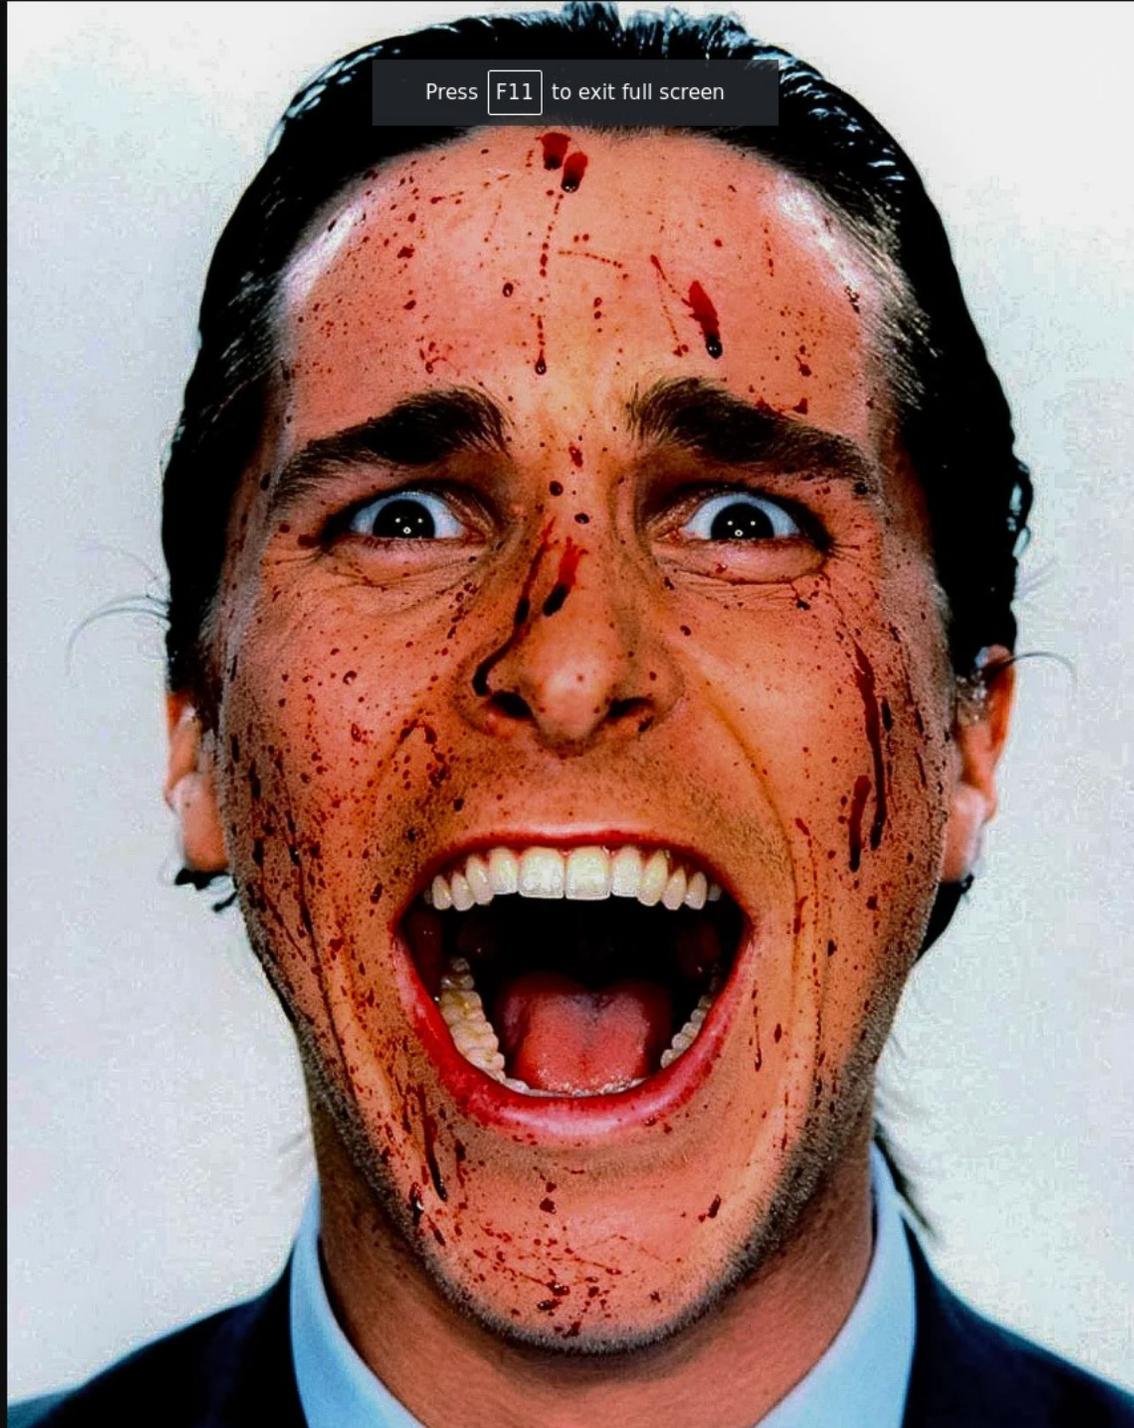

Men.

“To call a man an animal is to flatter him; he's a machine, a walking dildo.”

“Eaten up with guilt, shame, fears and insecurities and obtaining, if he's lucky, a barely perceptible physical feeling, the male is, nonetheless, obsessed with screwing; he'll swim a river of snot, wade nostril-deep through a mile of vomit, if he thinks there'll be a friendly pussy awaiting him. He'll screw a woman he despises, any snaggle-toothed hag, and, further, pay for the opportunity. Why? Relieving physical tension isn't the answer, as masturbation suffices for that. It's not ego satisfaction; that doesn't explain screwing corpses and babies.”

French feminist Luce Irigaray calls “ $E=mc^2$ ” a “sexed equation.” She claims that it is sexist because “privileges the speed of light over other speeds that are vitally necessary to us.”

4. Santhi Soundarajan

Santhi Soundarajan (right)

Karim Jaafar / AFP / Getty Images

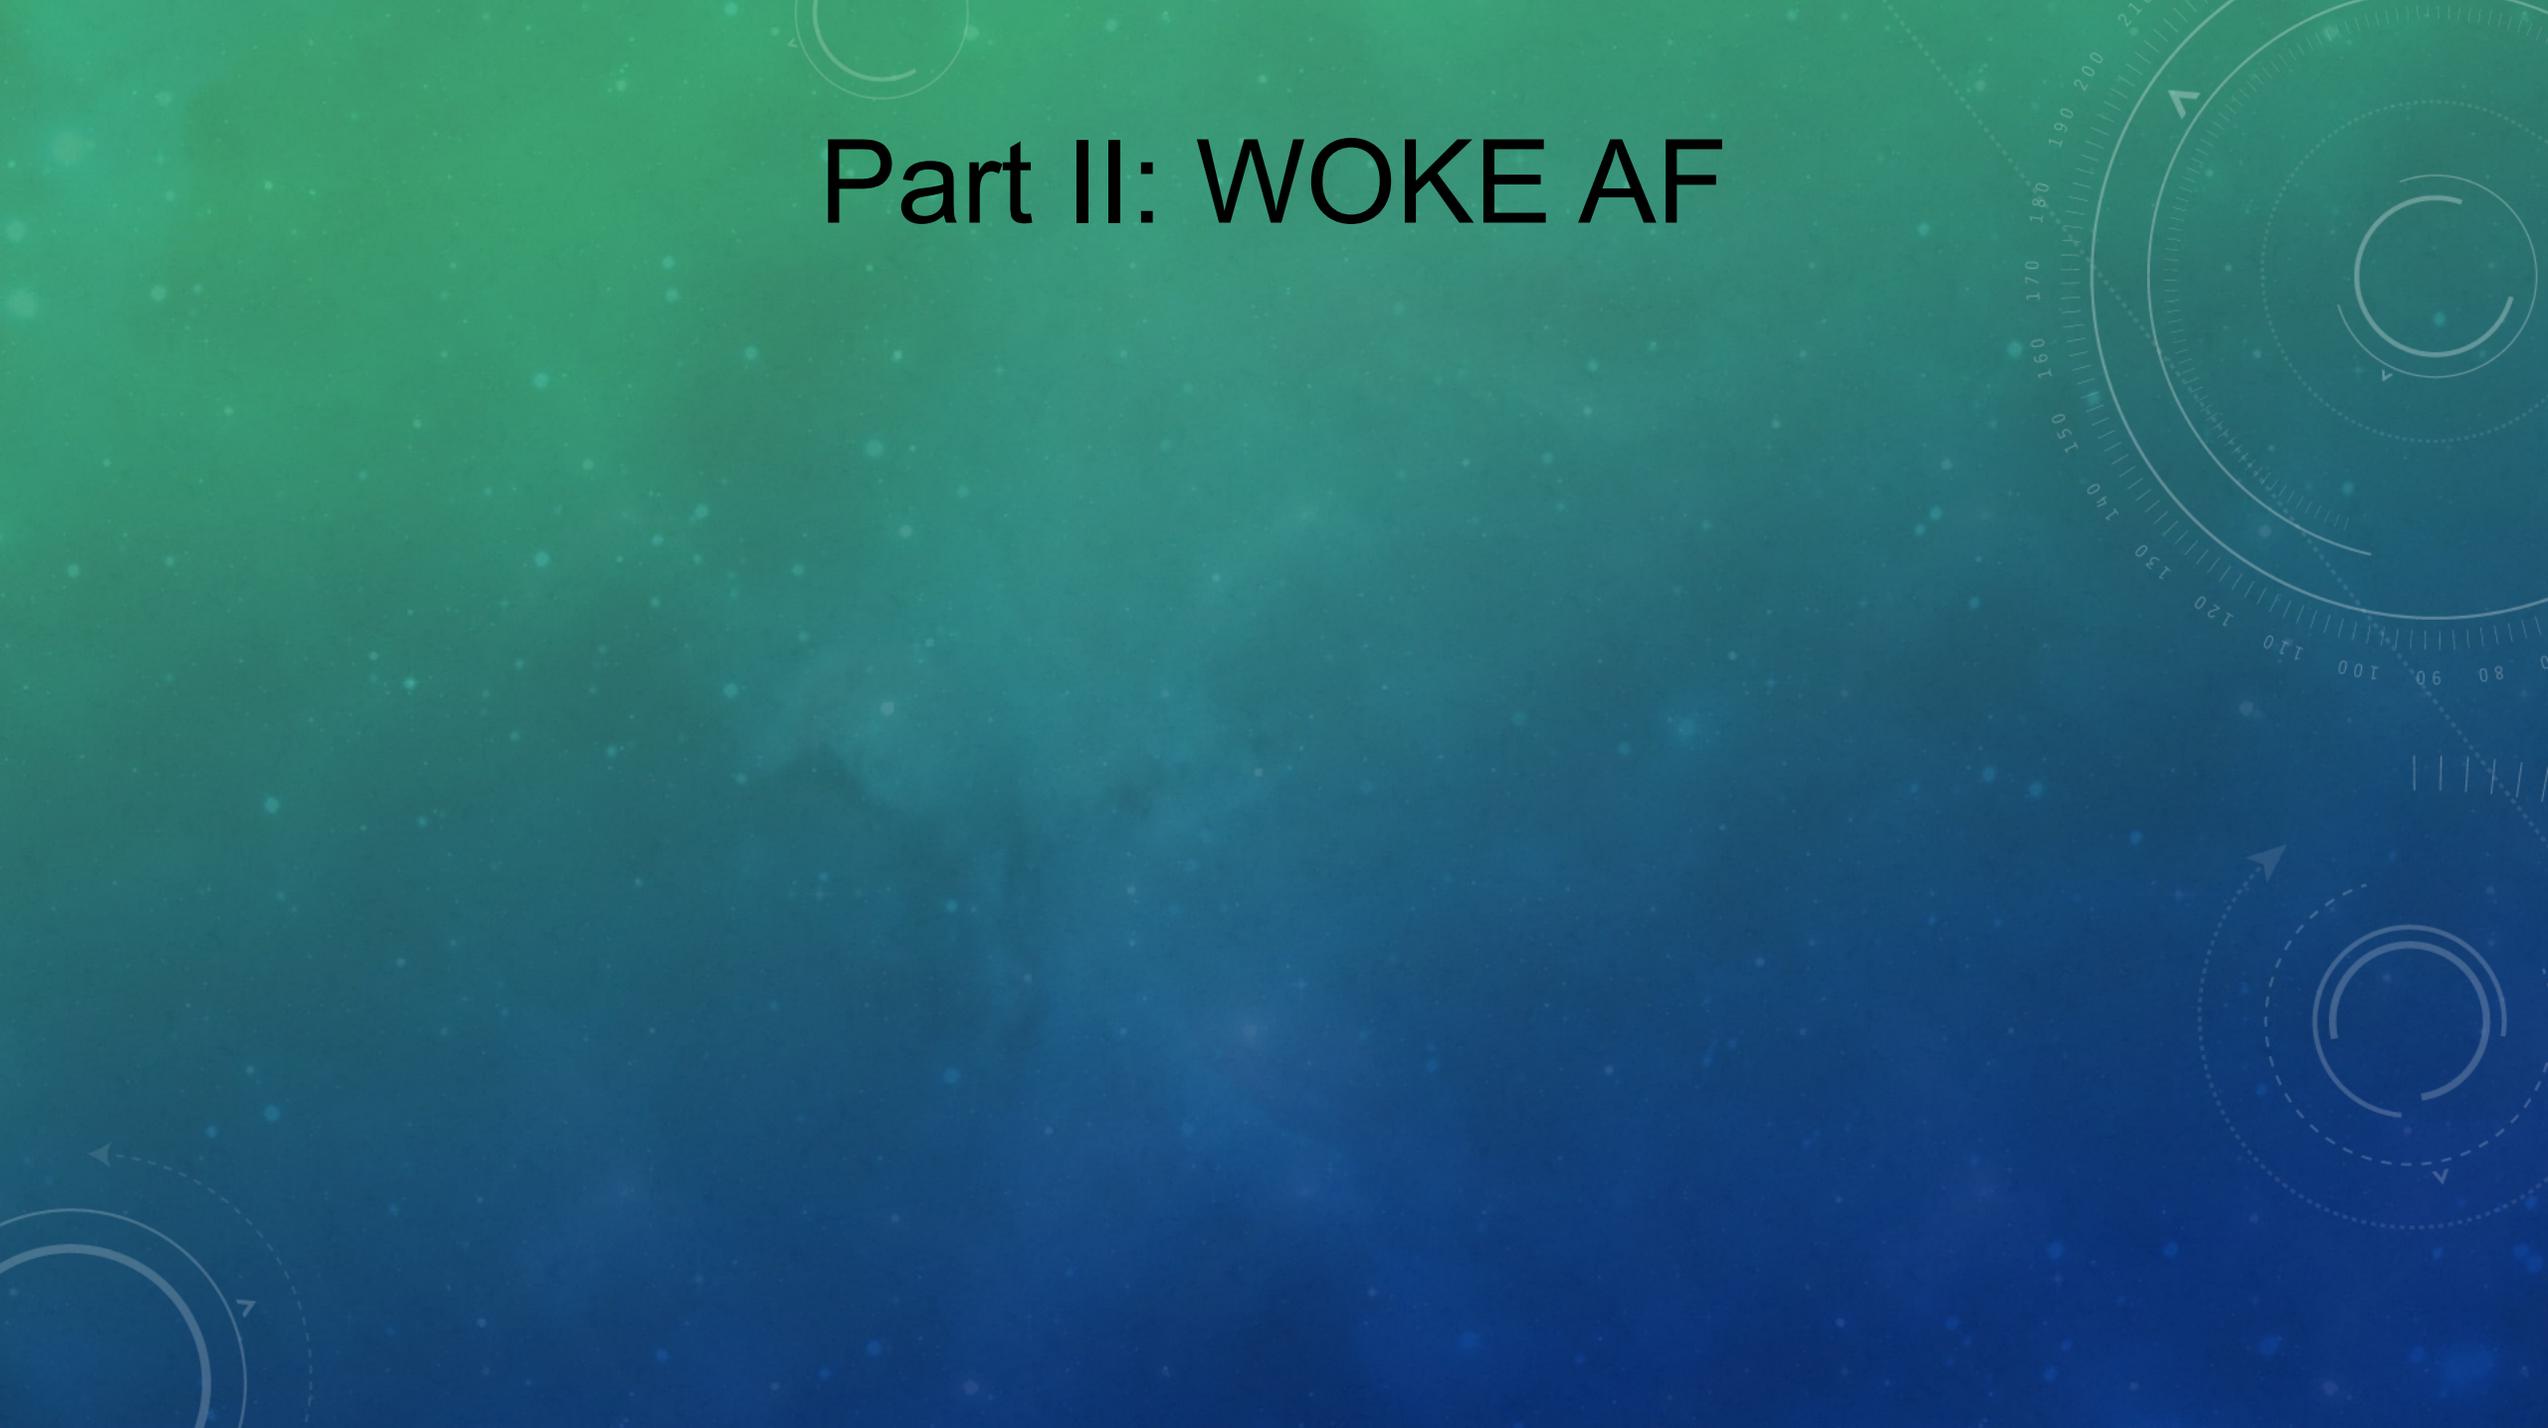

In 2006, 25-year-old Santhi Soundarajan from India ran in the 800 meter race at the Asian Games in Qatar. Competing against athletes from 45 countries, she won a silver medal.

The next day, however, Soundarajan was called in for a blood test and asked her to undress. A few days later, it was announced on Indian national television that Soundarajan had been stripped of her medal because she had failed a sex test. Although born and raised as a girl, Soundarajan carried a Y chromosome. Like Martínez-Patiño, she was born with androgen insensitivity syndrome and had female genitalia.

Although she had never before doubted being a woman, Soundarajan was suddenly thrust forward publicly as a gender imposter. Struggling with depression, she attempted suicide shortly after returning to India.

Abstract

Background and objectives

Trigger warnings notify people of the distress that written, audiovisual, or other material may evoke, and were initially used to provide for the needs of those with posttraumatic stress disorder (PTSD). Since their inception, trigger warnings have become more widely applied throughout contemporary culture, sparking intense controversy in academia and beyond. Some argue that they empower vulnerable individuals by allowing them to psychologically prepare for or avoid disturbing content, whereas others argue that such warnings undermine resilience to stress and increase vulnerability to psychopathology while constraining academic freedom. The objective of our experiment was to investigate the psychological effects of issuing trigger warnings.

Methods

We randomly assigned online participants to receive ($n = 133$) or not receive ($n = 137$) trigger warnings prior to reading literary passages that varied in potentially disturbing content.

Results

- Trigger warnings increase peoples' perceived emotional vulnerability to trauma
- Trigger warnings increase peoples' belief that trauma survivors are vulnerable.
- Trigger warnings increase anxiety to written material perceived as harmful

„Es tut uns sehr leid, dass diese Nachricht so spontan kommt und wir dir leider absagen. Der Grund dafür ist, dass wir gerade bei diesem globalen Streik auf ein antikolonialistisches und antirassistisches Narrativ setzen und es daher für uns nicht vertretbar ist eine weiße Person mit Dreadlocks auf unserer Bühne zu haben. Dreadlocks bei weißen Menschen sind eine Form der kulturellen Aneignung, da sie mit der Identität von Schwarzen Menschen und es in den Zeiten der Sklaverei von weißen Menschen als ein Zeichen der Unterdrückung genutzt wurde. Aus diesem Grund sollten weiße Menschen keine Dreadlocks tragen, da sie sich einen Teil einer anderen Kultur aneignen, ohne die systematische Unterdrückung dahinter zu erleben.

Wir hoffen, dass du dich damit auseinandersetzt und wir bieten dir an bei Bedarf in den Tagen nach der Demo diesbezüglich in einen Austausch zu gehen. Solltest du dich bis Freitag dazu entscheiden deine Dreadlocks abzuschneiden, würden wir dich natürlich auf der Demo begrüßen und spielen lassen.“

- Fridays For Future

differences.

Drawbacks

Despite the movement having the potential for good, people have criticized it for its potential drawbacks. These include:

Health concerns

Promoting positive body image is generally a good thing. In fact, research has shown that body image is [closely linked](#) to mental health and weight management.

However, critics argue that the body positivity movement ignores the health risks associated with carrying excess body weight.

According to the [Centers for Disease Control and Prevention \(CDC\)](#)[®], obesity raises a person's chance of getting:

- diabetes
- high blood pressure
- joint conditions
- breathing problems, such as asthma
- gallbladder disease

[Visit our obesity hub to learn more about weight management.](#)

Lack of diversity

[Researchers](#) note that the body positivity movement lacks diversity, showing that it has not achieved the goal of inclusivity.

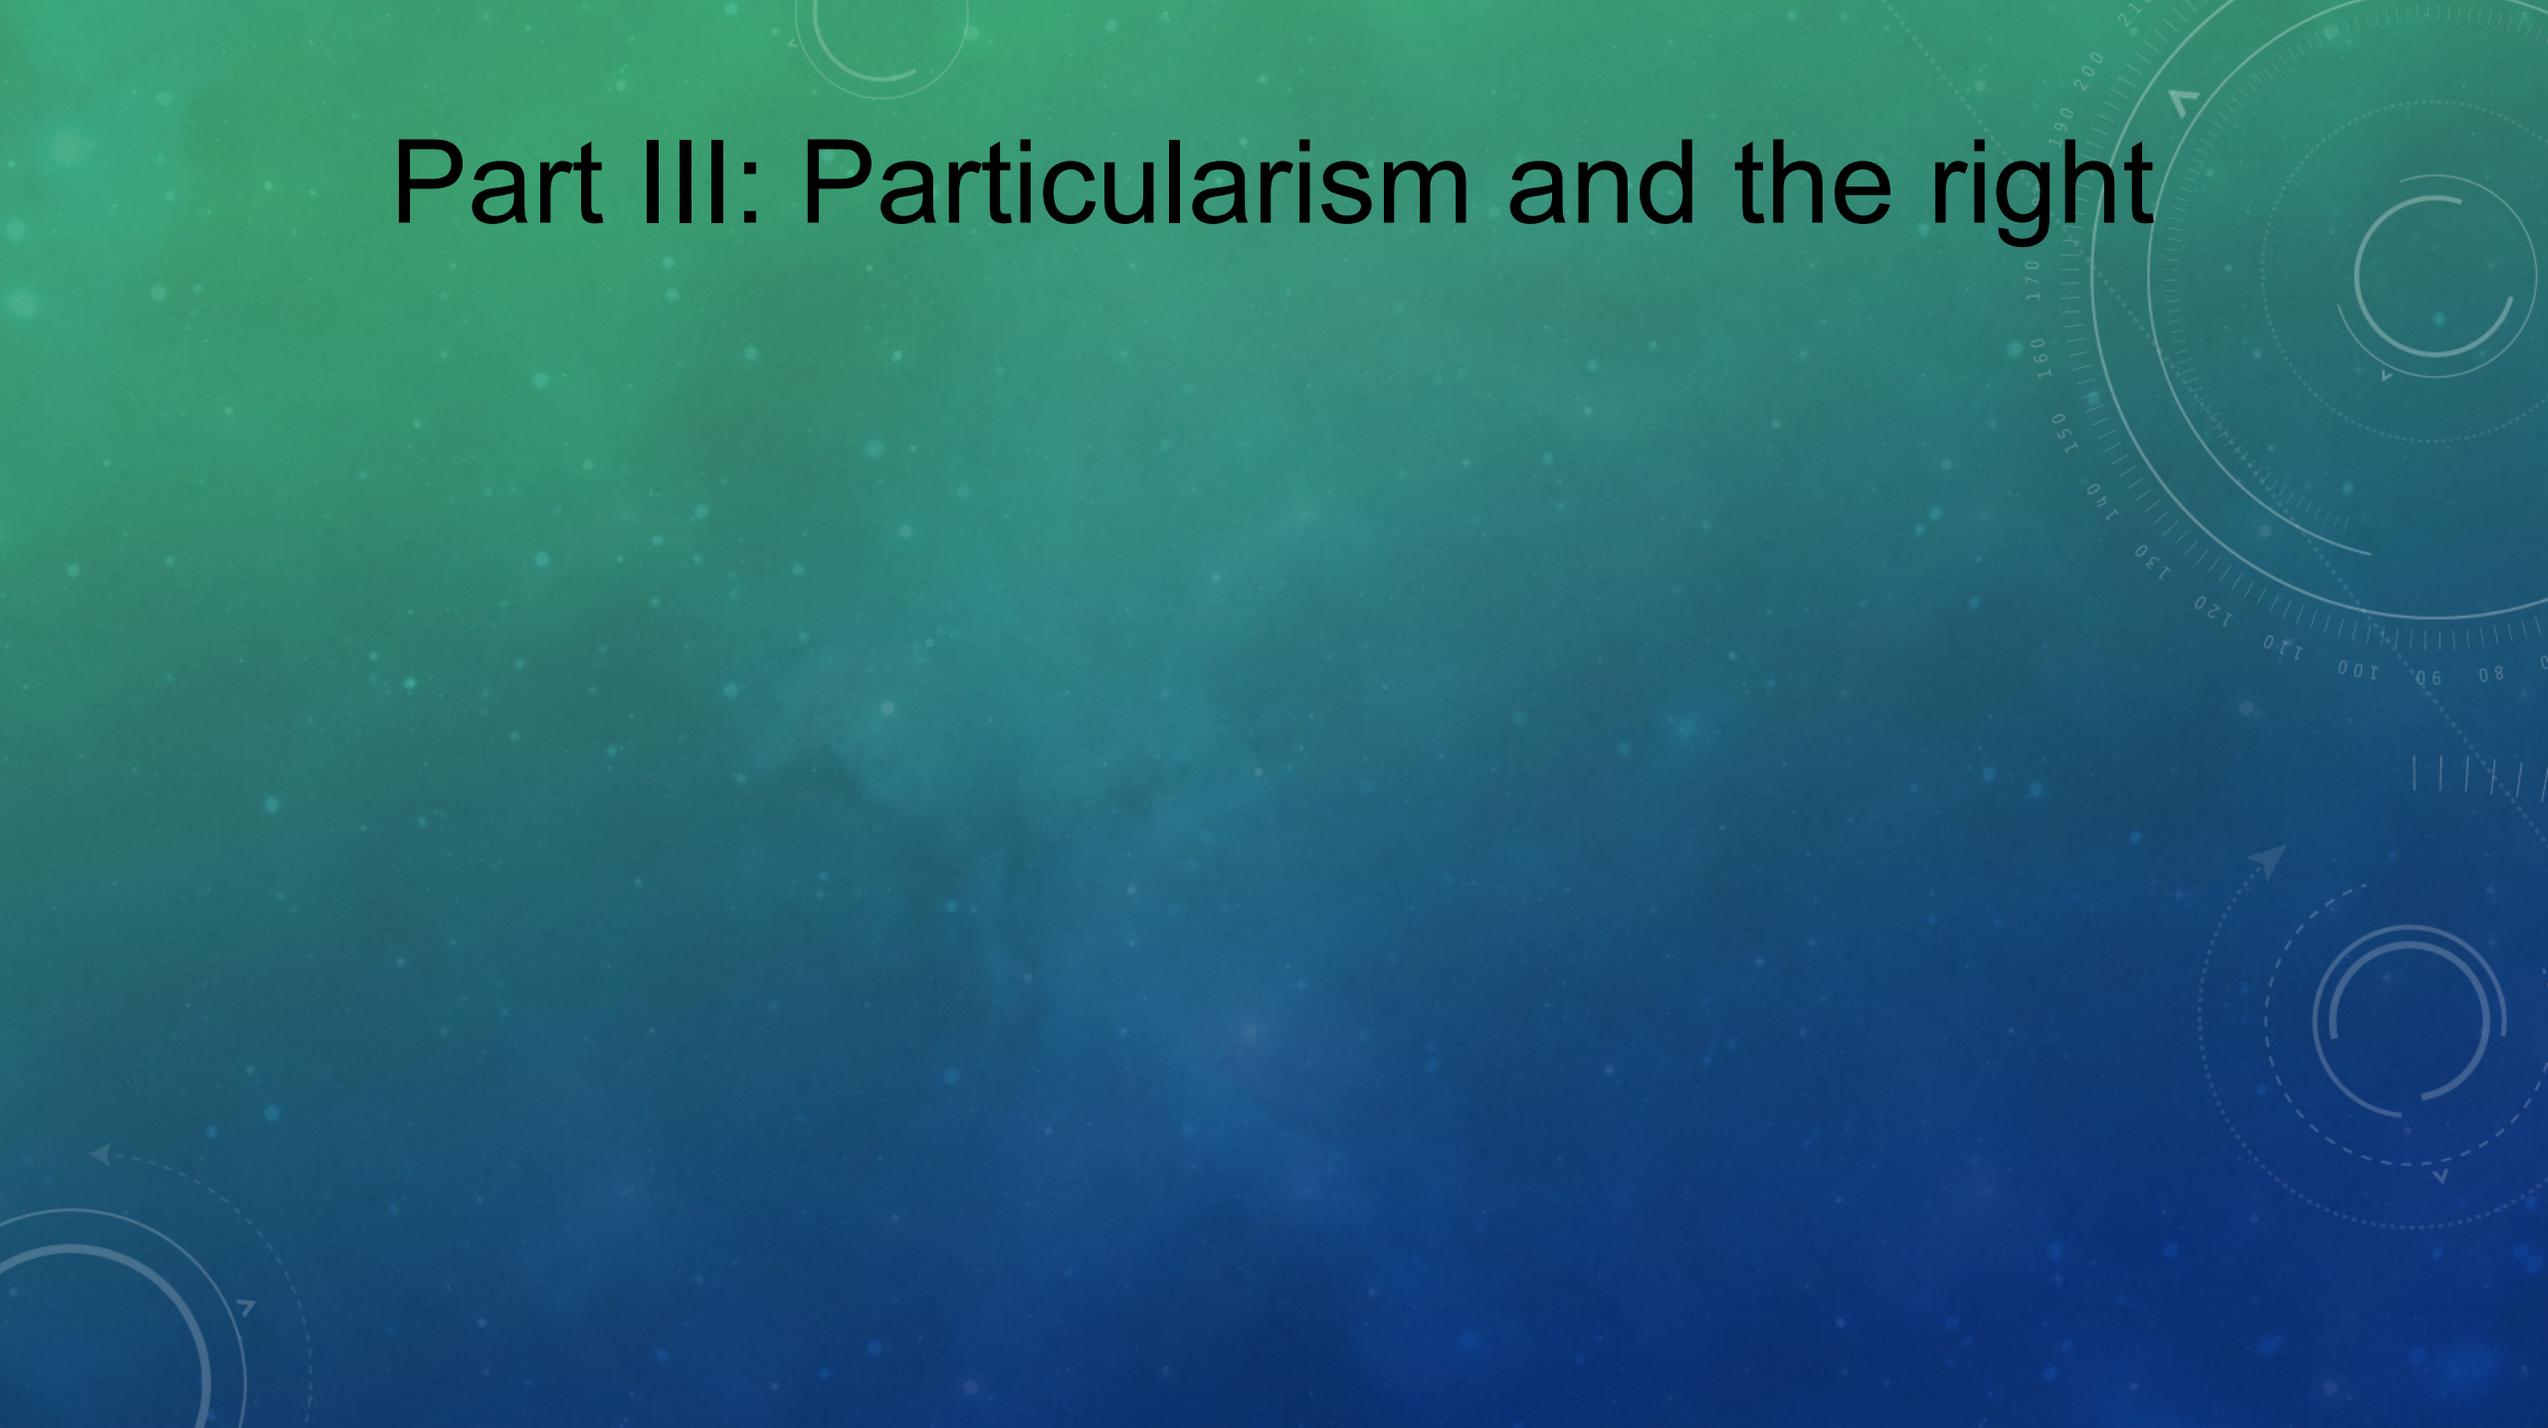

Most of the Instagram posts that use the movement's hashtags portray young, white, conventionally attractive, non-disabled, cisgender females. People of other ethnicities, males, people from LGBTQIA+ communities, and older adults do not have adequate representation.

- a specific, but widespread form of vulgar critical theory, „toxic wokeness“ leads to particularization
- isolated individuals can by logic never communicate, only feel
- hinders action

Part III: Particularism and the right

Jordan Peterson:

"We have this idea in our culture that you can be a woman born in a man's body, and that's not true."

...true self-understanding is only ever a by-product of discovering the truth about God.

"There's no such thing as climate."
"More people die every year from solar energy than die from nuclear energy."

- Non-speech: triggers adverse reaction
- perceived elitism lets people go for more „down to earth“ rightist narratives
- Particularization lets rightists divert through toxic woke scandals from real issues
- „toxic wokeness“ reservable: AFD does not want black music in radio because of „Leitkultur“

Part IV: Letzte Generation UNIVERSALIST AF

Finances [[edit](#)]

Business Insider first reported a profit in the fourth quarter of 2010.^{[16][17]} As of 2011, it had 45 full-time employees.^[18] Its target audience at the time was limited to "investors and financial professionals".^[18] In June 2012, it had 5.4 million unique visitors.^[19] As of 2013, **Jeff Bezos** was a *Business Insider* investor,^{[20][21]} his investment company Bezos Expeditions held approximately 3 percent of the company as of its acquisition in 2015.^[4]

In 2015, **Axel Springer SE** acquired 88 percent of the stake in **Insider Inc.** for \$343 million (€306 million),^[1] implying a total valuation of \$442 million.^[2]

Divisions [[edit](#)]

Business Insider operates a paid division titled *BI Intelligence*, established in 2013.^[22]

In July 2015, *Business Insider* began the technology website *Tech Insider*, with a staff of 40 people working primarily from the company's existing New York headquarters, but originally separated from the main *Business Insider* newsroom.^[23] However, *Tech Insider* was eventually folded into the *Business Insider* website.^[24]

In October 2016, *Business Insider* started *Markets Insider* as a joint venture with Finanzen.net, another Axel Springer company.^[25]

Bias, reliability, and editorial policy [[edit](#)]

Glenn Greenwald has critiqued the reliability of *Business Insider*, along with that of publications including *The Wall Street Journal*, Yahoo! News, and *Slate*.^[26] In 2010, Business Insider falsely reported that New York Governor David Paterson was slated to resign;^[27] *BI* had earlier reported a false story alleging that Steve Jobs experienced a heart attack.^[28]

In April 2011, Blodget sent out a notice inviting publicists to "contribute directly" to *Business Insider*.^[29] As of September 2011, *Business Insider* allowed the use of **anonymous sources** "at any time for any reason", a practice which many media outlets prefer to avoid or at least indicate why a source is not identified.^{[30][31]} According to the World Association of Newspapers and News Publishers, *Business Insider* gave **SAP** "limited editorial control" over the content of its "Future of Business" section as of 2013.^[32] The website publishes a mix of original reporting and aggregation of other outlets' content.^{[33][34]} *Business Insider* has also published **native advertising**.^[35]

Reception [[edit](#)]

In January 2009, the *Clusterstock* section appeared in *Time*'s list of 25 best financial blogs,^[36] and the *Silicon Alley Insider* section was listed in *PC Magazine*'s list of its "favorite blogs of 2009".^[37] 2009 also saw *Business Insider*'s selection as an official **Webby** honoree for Best Business Blog.^[38]

In 2012, *Business Insider* was named to the *Inc.* 500. In 2013, the publication was once again nominated in the Blog-Business category at the Webby Awards.^[39] In January 2014, *The New York Times* reported that *Business Insider*'s web traffic was comparable to that of *The Wall Street Journal*.^[40] In 2017, *Digiday* included imprint *Insider* as a candidate in two separate categories—"Best New Vertical" and "Best Use of Instagram"—at their annual Publishing Awards.^[41]

The website has faced criticism for what critics consider its **clickbait**-style headlines.^{[42][43][44][45]} A 2013 profile of Blodget and *Business Insider* in *The New Yorker* suggested that *Business Insider*, because it republishes material from other outlets, may not always be accurate.^[46]

In 2022, *Insider* won the **Pulitzer Prize** for Illustrated Reporting and Commentary for its reporting on the **Uyghur genocide**.^{[47][48]}

SCUM MANIFESTO

VALERIE SOLANAS

INTRODUCTION BY AVITAL RONELL

"Articulate, angry and funny." *Guardian*

- Weapon of choice: Occam's razor: "entities should not be multiplied beyond necessity"

- the climate catastrophe is THE ultimate necessity

- that is all the universalism we need.

„To think of trees is a crime in these times.“

- Berthold Brecht

The problems:

- particularization has had philosophy lose the focus. There is no neutrality any more. Not acting is not an option.

- right wing - male - counterfactual narratives rule the world: climate-denial, conservatism, capitalism

The Questions:

- How can philosophy help society refocus?

- Think Solanas Which new narratives can be made, that are stronger than what counterfactual parties have?

- As we are on it: What about the ultimate ignored topic: deathism?
